

Region One Aboriginal Business Association

What we offer:

- ROABA is the focal point for aboriginal business issues in the region. Industry and Business communicate through our organization to develop opportunities for our members.
- Networking opportunities are developed for the membership both within the organization of full and associate members, and for the new players setting up developments in the region.
- Business-to-Business relationships are encouraged and fostered by our organization. These include the development of working relationships on a project or permanent basis. We also encourage our members to utilize fellow ROABA companies for the supply of goods and services.
- ROABA committees are formed to deal with specific issues that are topical as they relate to the organization. This encourages a teamwork approach to solving a shared issue, such as maintaining and acquiring skilled employees in the region.

Think of ROABA as your doorway to opportunity, opening doors and creating a commination link to the people who need to hear your message.
